Weber 32/36 DGV rebuilt none currently available

\$250.00

We have available 32/36 DGV Rebuilt carburetors. Rebuilt DGV and DGAV carbs are **hot tested on our own test engine**. You are buying a value added product here. These are better than new, because of the features listed. These carburetors are rebuilt at our facility here, and include all new gaskets, needle valves, power valve diaphragm, and pump diaphragms. **We install our throttle shaft bearing kit into both barrels. This has the proper top cover gasket as well.**
